

BAND-IT®

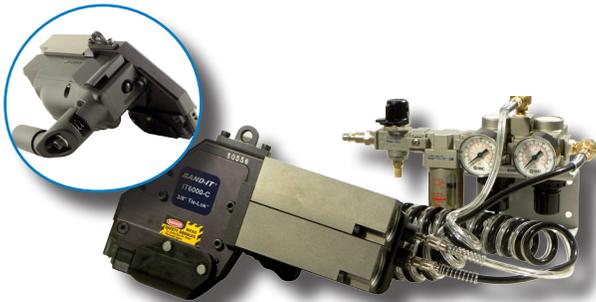

Millions of BAND-IT® clamps used in today's exhaust applications

Exhaust Heat & Sound Shield Fastening

BAND-IT exhaust shield fastening systems are used by many of the largest Tier I exhaust manufacturers in the automotive industry.

The BAND-IT Edge

- Engineered clamping systems that will meet your application requirements
- Reduced warranty repairs due to thermal cycling
- Permanent mechanical lock
- Clamp conforms to any shape
- Vibration Resistant
- More cost effective than welding
- Effective performance at extreme temperatures

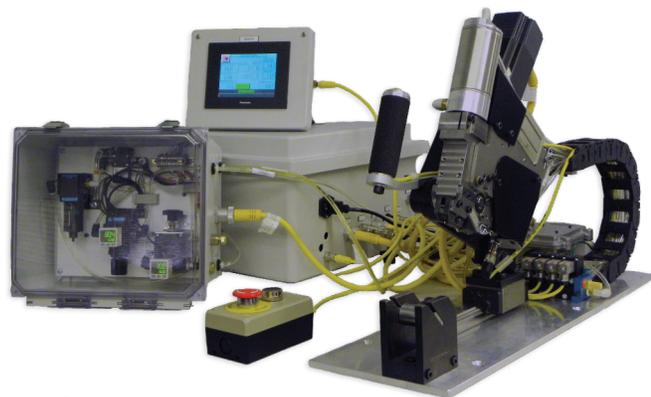

IT6000-C Tool with air hose and regulator

Industrial Tool Series

The Industrial Tool (IT) Series offers extreme manufacturing flexibility for any banding application.

Intelligent Clamping System

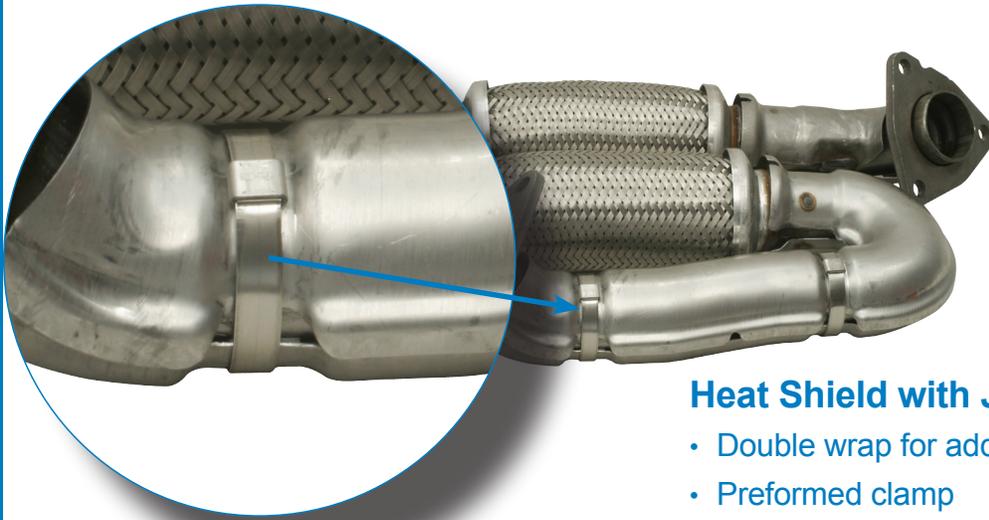

The Intelligent Clamping System (ICS) machine offers advanced data feedback that allows you to effectively monitor your manufacturing process.

Stainless Steel Fastening for the Automotive Industry

Stainless Steel Fastening for the Automotive Industry

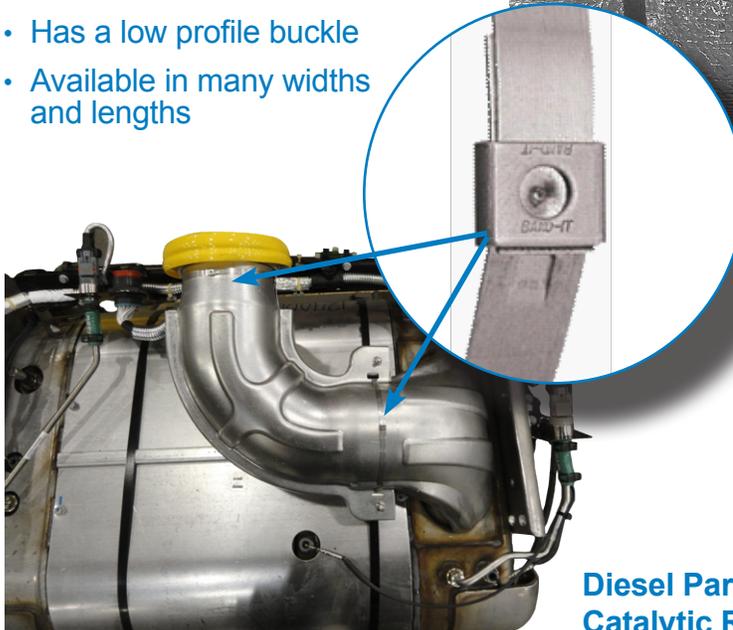

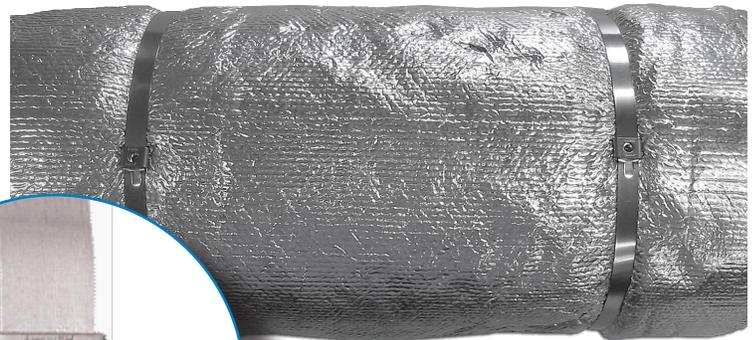

Junior® Preformed Clamps

Heat Shield with Junior® Clamp

- Double wrap for additional clamping strength
- Preformed clamp
- Available in many diameter & widths

Heat Shield with Tie-Lok® Tie

- Clamp conforms to any shape
- Large diameter range
- Vibration Resistant
- Has a low profile buckle
- Available in many widths and lengths

Tie-Lok® Tie

Diesel Particulate Filter (DPF), Selective Catalytic Reduction system (SCR)
